

JUDY FINANCE

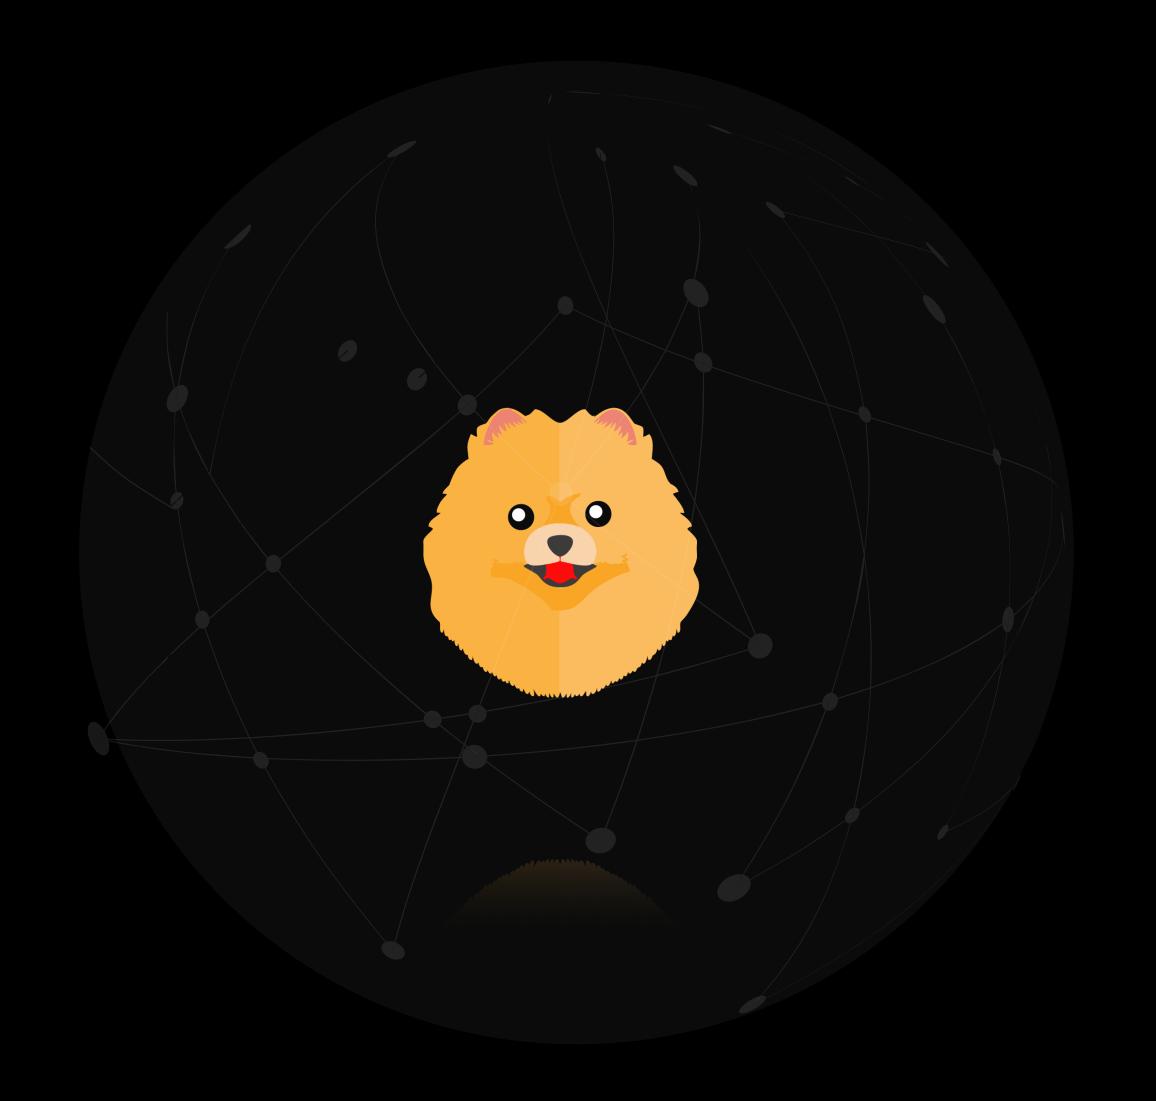

DATE 20/10/2021

Abstract

Judy name is based true of real life Pomeranian us called Judy Baaba ;)

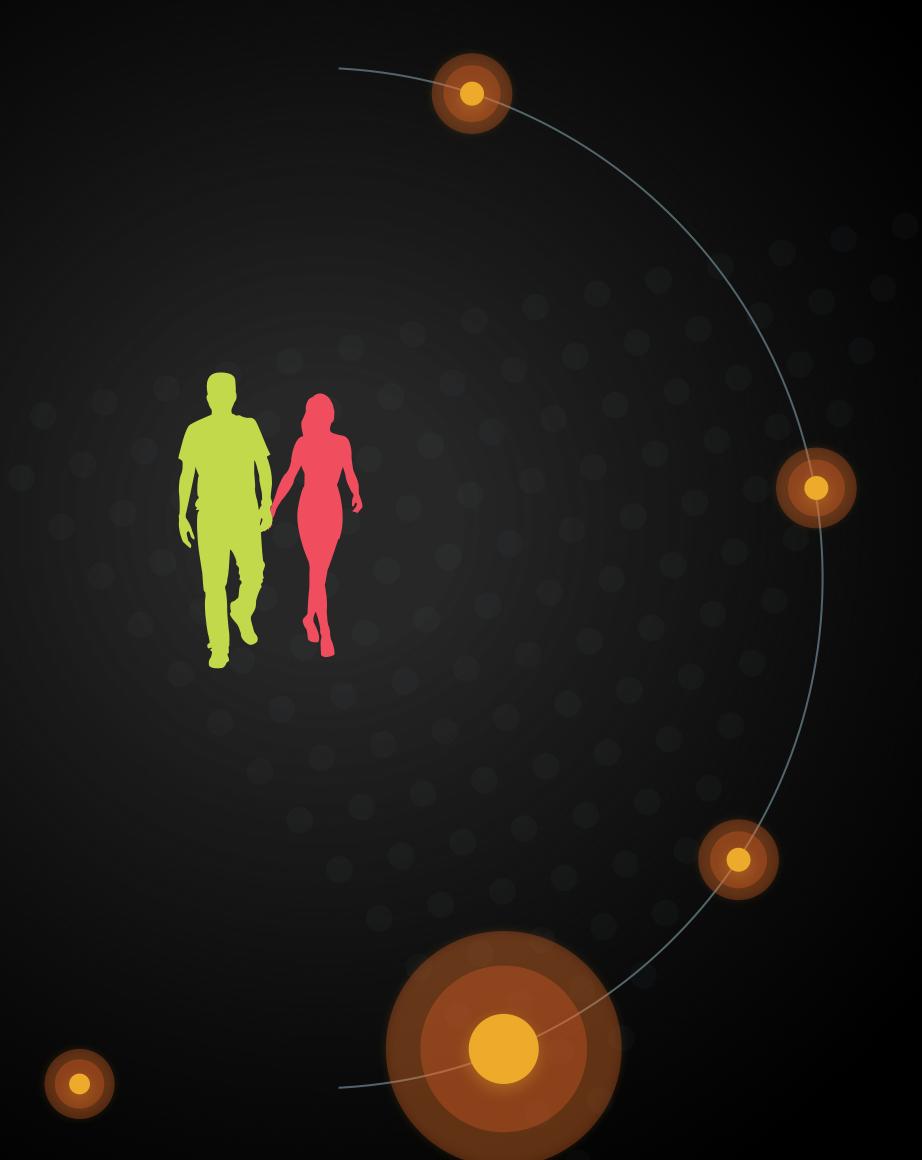

The JUDY Ecosystem functions as a DAO (Decentralized Autonomous Organization) and comprises of a combination of decentralized functions and features designed to enable opportunities for the general public to participate and receive cryptographic, or blockchain enabled, earnings or rewards; as well as be empowered to be a part of a democratized consensus driven environment without borders or external governance.

JUDY started out with one goal in mind, to establish itself as an industry leader in building both utility focused technology and utility focused communities who are seeking opportunities to maximize their financial wellbeing. JUDY Finance is a community-focused DeFi ecosystem focused on providing innovative mathematic financial instruments to the JUDY Community.

Popularized by HODL and others, a transaction fee is applied to every single buy sell order, tokens are then swapped in realtime for BB and added to a POOL (similar to how liquidity pools work). Holders can then go to a website and manually claim the BNB earned at specific time (daily / weekly / etc.).

The BB they can collect are based on their token holdings % and the current pool size. TL;DR: You hold, then go to the website and request your BNBS

The invention of BSC was revolutionary to the blockchain ecosystem as a whole, gained a way to launch their own tokens and smart contracts. For years, the BSC network was the default place for launching innovative blockchain-based projects. There are many benefits of the BEP20 standard. It makes it possible for developers to develop DApps on the BSC blockchain. It also helps streamline the whole standardized process. This is the reason that \$JUDY use the technology of BEP-20 Token.

Token Summary & Tokenomics

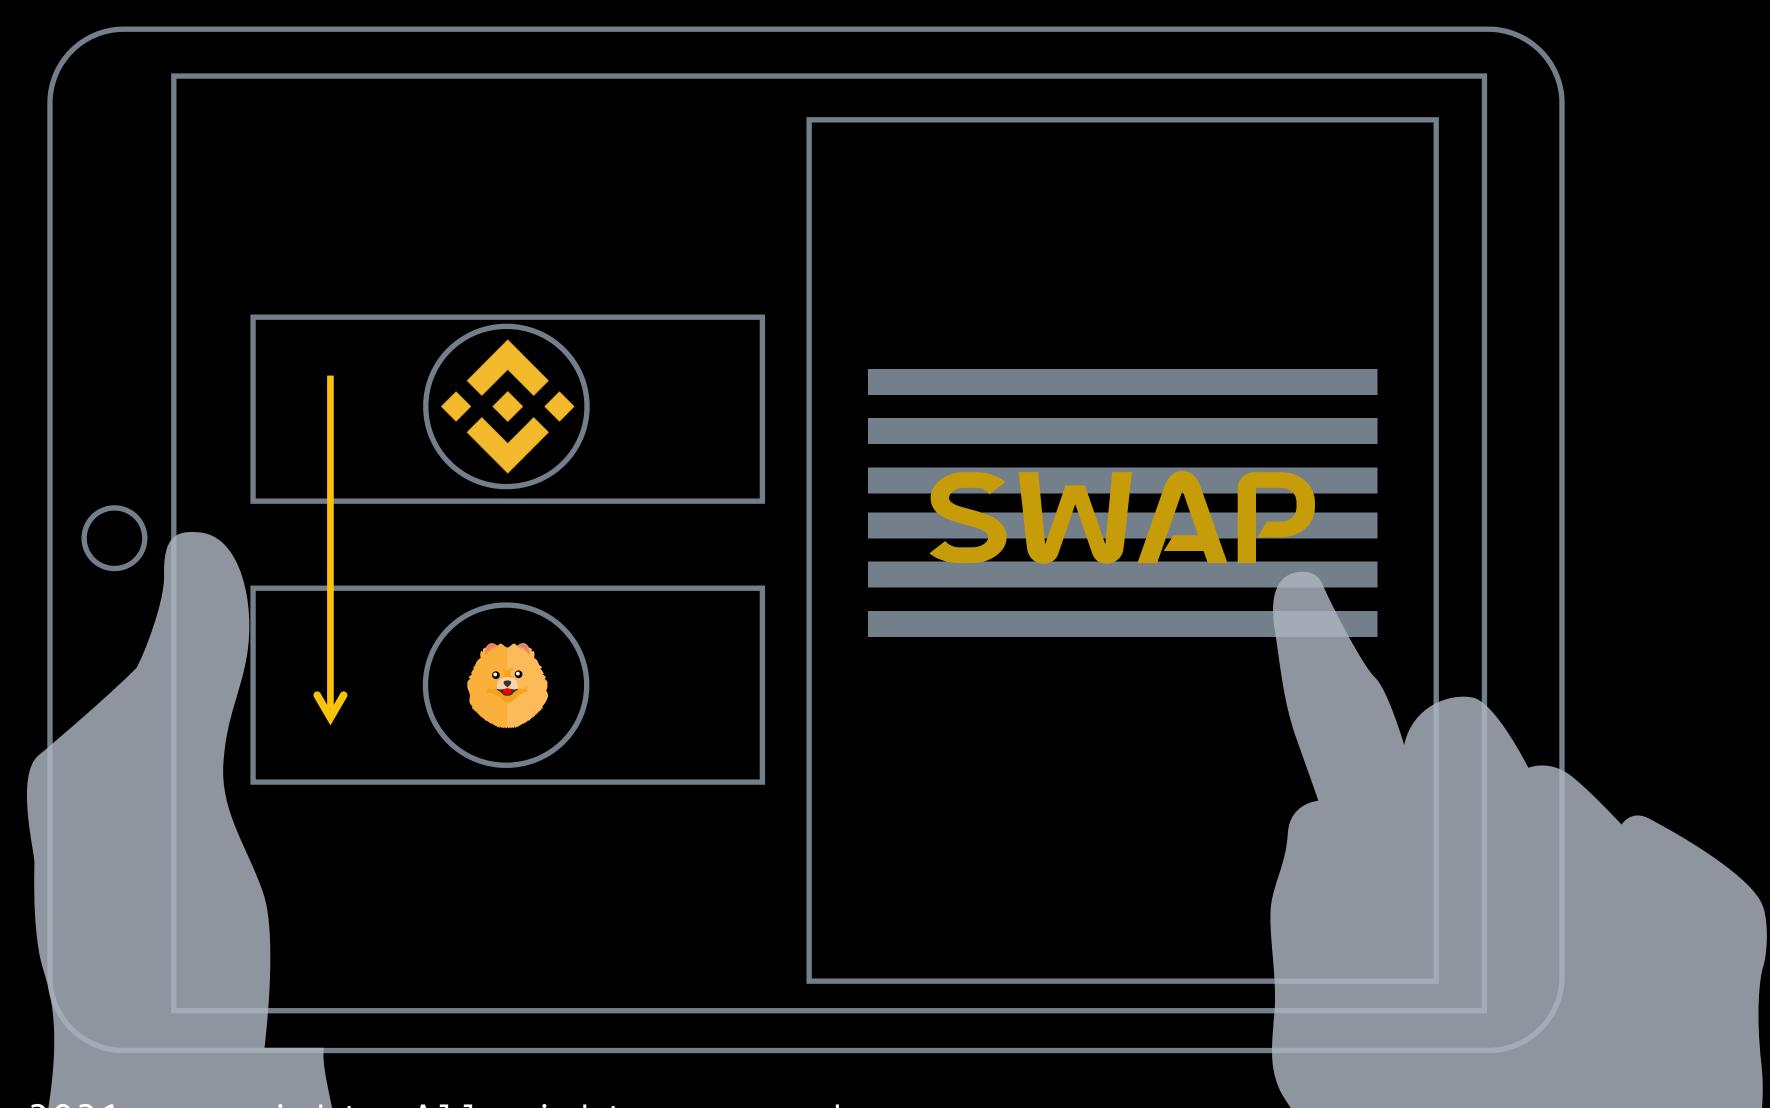

SYMBOL: JUDY

| Total Supply | 1,000,000,000,JUDY |
|------------------------|---|
| Minimum Total Supply | 50,000,000,000 JUDY |
| Burn rate | 3% of every transfer/trade |
| Redistribution | 3% of every transfer/trade |
| Charity | 3% of every transfer/trade |
| Liqudity Pool | 3% of every transfer/trade |
| Smart-contract address | :0xe070E76b7206A368Fe3cF45bfe 456a73f43ca3b2 |

OPEN YOUR WALLET APP

Don't have a wallet app?
Download the MetaMask
extension or get the app for iPhone & Android

SEND BNB TO METAMASK

Get \$BNB from an exchange or transfer \$ETH from your existing wallet to your MetaMask wallet address

CONNECT TO PANCAKESWAP

Head over to PANCAKESWAP and connect your wallet by cliking "Connect Wallet". Get ready to sign when asked for signature

SWAP \$BNB FOR \$JUDY

Set the slippage tolerance to 6%-8%. Enter the amount of \$ETH you would like to swap and make sure to keep enough \$ETH in your wallet for gas fee!
Lastly, HODL!

Disclaimer

Be aware of the risks of impermanent loss when farming with two volatile assets. Resources that cover this topic are abundantly available on the internet - To briefly summarize, if you farm with two assets, and one of them significantly rises or falls in value over the other token, you will suffer an impermanent loss of the second token. This is the case with any AMM (automated market maker) liquidity pool system.
